TECHNICAL SPECIFICATIONS

DEPLOYMENT

- Flexible integration with existing IT processes
- Compatible with custom ISO deployments
- Supports Command Center's network boot capabilities for high-volume deployments
- Portable USB-based solution for offline device enrollment checks

SCALABILITY

- Adaptable to various operational scales
- Fast, easy bulk enrollment status checking
- Supports high-volume enrollment detection

FEATURES

- Enrollment pre-detection verification
- Easy re-checking of device enrollment status
- Search and filter capabilities for enrollment records
- Ability to collect enrollment information from offline devices
- Drag & drop file upload to Customer Portal for easy enrollment status detection

EASE OF USE

- Quick, straightforward enrollment status detection
- Simple USB drive-based data collection
- No internet access required for initial device information gathering
- Easy searching and filtering of enrollment records by serial number
- Eliminates need for repeated device processing

LICENSING

- Flexible licensing: Purchase only the licenses you need
- Non-Expiring Licenses: No renewal hassles or unexpected costs

KEY BENEFITS

- Prevents processing of enrolled devices
- Reduces wasted time and resources shipping enrolled devices
- Supports on-site visits and remote location processing
